Frontend Developer – Angular

Description

TL,DR; – Check out a 3D Print slicing software in this video link – <https://www.youtube.com/watch?v=eUNTib5pEWA>. The new software we are developing at Fabheads is something similar but a lot more complicated/fun than the one on this video. If this type of software development is not your cup of tea, then please do not apply. Thanks for saving both of our time a bit. But if you do apply, please be prepared for some interesting assignments 🤖🤖

The ideal candidate will be responsible for developing, testing, and debugging our existing 3D printing slicing web-app. Using Angular and ThreeJS, you will be developing new exciting features in India's first 3D slicing software.

Responsibilities

1. Implementing new features for our existing 3D printing Slicing app using Angular and ThreeJS (3D). This will include handling and manipulating 3D objects
2. Implement UI / UX features in the user interface
3. Implementing unit and integration tests in close collaboration with testers
4. Implementing new and maintaining existing API endpoints / sockets
5. Drafting new features based on product requirements, with maintainability and future proof software architectures in mind

Qualifications

1. A minimum of 3 years experience in web development with JavaScript and Typescript, knowing both the languages and common libraries
2. Profound experience with frontend frameworks, preferably Angular
3. Experience with ThreeJS or any similar 3D library (can be a deciding factor)
4. Good experience with git based development in multi-dev teams
5. A good understanding of HTML and CSS and how to implement designs
6. Successfully implemented (complex) web applications which make heavy use of JavaScript and Angular
7. Working experience with REST APIs (having worked with Django is a big plus)
8. Cloud experience, preferably with Ubuntu (AWS / DigitalOcean)
9. A Master / Bachelor degree in computer science or similar, or self-taught top-notch coding skills

We will be thrilled if you have:

- Experience with Django, general dev-ops
- Experience with 3D printing and its softwares
- Well-versed in 3D graphics
- Experience in debugging and profiling applications and improving their
